The information in this course was written as a general guide. HARDI has neither liability nor is responsible to any person or entity for any misunderstanding, misuse or misapplication that would cause loss or damage of any kind, including loss of rights, materials, or personal injury, or alleged to be caused directly or indirectly by the information contained in this course.

Learning Objectives

This training course covers heating and cooling controls most often used in residential, apartment, and light commercial structures in which unitary package-type equipment and electric powered controls are installed.

After completing this course, a typical student should be able to:

- 1) Read and recite basic control terminology.
- 2) Identify basic control components and explain their function in the circuit.
- 3) Understand the basic steps in troubleshooting control problems.

Student mastery of these objectives will be demonstrated by successful completion of three written examinations during the training period.

Course Content

1. A Review of Basic Electricity

The Basics of Electricity	Lesson 1, Page 3
Types of Current Electricity	Lesson 1, Page 5
Electrical Currents	Lesson 1, Page 6
Electric Current	Lesson 1, Page 8

2. The Transformer

Transformers	Lesson 2, Page 2
Electrical Loads	Lesson 2, Page 4
Phasing	Lesson 2, Page 6
Testing on the Job	Lesson 2, Page 8

3. The Basic Control Circuit

Series Circuit	Lesson 3, Page 2
Parallel Circuits	Lesson 3, Page 4
Circuit Diagrams	Lesson 3, Page 5
Circuit Analysis	Lesson 3, page 6

4. The Low Voltage Thermostat

Thermostatic Bimetals	Lesson 4, Page 3
Adjusting Devices	Lesson 4, Page 6

5. Thermostat Heat & Cold Anticipation

Heat Anticipation	Lesson 5, Page 2
Types of Heat Anticipators	Lesson 5, Page 3

6. Thermostat Droop

Sizing the Heat Anticipator	Lesson 6, Page 2
Outdoor Compensation	Lesson 6, Page 3

7. Two-Stage Thermostats

Two-Stage Thermostats	Lesson 7, Page 2
Time Controlled Room Thermostats	Lesson 7, Page 4
How to Install Room Thermostats	Lesson 7, Page 5

8. The Humidistat

Humidistat Design Details	Lesson 8, Page 2
How to Install a Room Humidistat	Lesson 8, Page 4

9. The Controller Part I: Sensing Elements

Components of the Sensing Element	Lesson 9, Page 4
-----------------------------------	------------------

10. The Controller Part II: Transducers

Control Modus Using Electrical Transducers	Lesson 10, Page 2
Common Two-Position Controllers	Lesson 10, Page 4
Control Sequence	Lesson 10, Page 8

11. The Electrical Relay

How Magnetic Relays Work	Lesson 11, Page 2
Contacts	Lesson 11, Page 3
The Electromagnetic Section	Lesson 11, Page 4
Beating AC Hum	Lesson 11, Page 4
Residual Magnetism	Lesson 11, Page 5
Thermal Relay	Lesson 11, Page 6

12. Solid State Devices

Practical Electronic Principles	Lesson 12, Page 2
Solid State Concepts	Lesson 12, Page 4
Solid State (Thermistor) Thermostats	Lesson 12, Page 5
SCR Motor Speed Control	Lesson 12, Page 7
Advantages of Solid State Components	Lesson 12, Page 10

13. Gas Burner Controls Part I: The Gas Distribution System

Pressure Regulation in Gas Supply Piping	Lesson 13, Page 3
Appliance Regulators	Lesson 13, Page 5
Burner Manifold Requirements	Lesson 13, Page 7

14. Gas Burner Controls Par II: The Automatic Pilot

The Thermocouple	Lesson 14, Page 2
Automatic Ignition System	Lesson 14, Page 4
Pilot Safety Devices	Lesson 14, Page 5

15. Gas Burner Controls Part III: Pressure Control at the Burner

Vent Leak Limiting Devices	Lesson 15, Page 4
Installation Guidelines	Lesson 15, Page 5
Field Testing, Adjustment, and Service	Lesson 15, Page 5

16. Gas Burner Controls Part IV: The Main Gas Valve

Combination Valves	Lesson 16, Page 3
Installing Combination Valves	Lesson 16, Page 6
Service Procedure	Lesson 16, Page 8
Gas Valves for Self-Generating Systems	Lesson 16, Page 9
Testing Single Thermocouples	Lesson 16, Page 11
Test Pilot Generators	Lesson 16, Page 12

17. Oil Burner Controls Part I: Stack-Mounted Primary Controls

Role of the Primary	Lesson 17, Page 2
Single-Piece Stack-Mounted Primary	Lesson 17, Page 2
Two Piece Stack-Mounted Primaries	Lesson 17, Page 7

18. Oil Burner Controls Part II: Burner-Mounted Primary Controls

Burner-Mounted Primaries	Lesson 18, Page 2
Burner-Mounted Primaries (Light Sensitive)	Lesson 18, Page 5
Servicing Solid State Primaries	Lesson 18, Page 7
Testing Cad Cell Controllers	Lesson 18, Page 8

19. Air Conditioning Controls Part I: How the Compressor is Controlled

Basic Circuit Functions	Lesson 19, Page 3
Compressor Motor Characteristics	Lesson 19, Page 4
Providing Running Protection	Lesson 19, Page 6
Starting Compressors	Lesson 19, Page 7

20. Air Conditioning Controls Part II: Troubleshooting Control Systems

General Service Procedures	Lesson 20, Page 2
Troubleshooting Circuits	Lesson 20, Page 5
Troubleshooting Relays	Lesson 20, Page 9
Electric Shock	Lesson 20, Page 13
Develop Safe Work Habits	Lesson 20, Page 16

21. Appendixes

Self-Check Answer Keys	Appendix A
Glossary	Appendix B
